And much more...

Are you receiving all the accountancy support you need?

In today's rapidly shifting business landscape, where tax laws evolve and customer expectations grow, having a financial partner who truly understands your unique challenges is essential. At Larking Gowen, we don't just offer services; we provide tailored, strategic support that empowers your business to thrive, adapt and succeed.

Effective financial management is critical to your success. That's why we offer a full suite of services designed not only to make sure your business is compliant with all the complex tax laws, but also to provide you with valuable insights and strategic support to grow your business. We offer fully outsourced services too, such as payroll and finance director support.

Our services

Annual accounts

Year-end financials are crucial, and our team understand that they can be a burden. That's why we deliver a customised service to make sure your annual accounts are prepared and submitted on time.

Whether you're a limited company, sole trader, or partnership, we take the stress out of year-end so you can stay focused on driving your business forward.

Tax compliance

Navigating tax regulations is complex, but it doesn't have to be stressful. Our comprehensive tax compliance services reduce the hassle from your tax obligations. From corporate tax returns to personal tax planning, we make sure you're fully compliant, whilst always striving to optimise your tax position and reduce risks.

Financial analysis and outsourced finance director

Compliance is just the beginning. Our team go beyond the numbers to deliver strategic insights that drive informed, impactful business decisions.

All of our support can be provided as a one-off project to give you the tools and templates to run on your own, or as ongoing proactive support to monitor, contribute and guide you throughout the financial year.

Whether you have an existing finance director in situ or not, our team can provide hands-on strategic support and analysis across a wide range of areas. The areas we're most frequently asked for support with include:

Budgets and forecasts

We can prepare forecasts and budgets for your business and provide ongoing support to track performance and support you in reaching your business goals.

Business review

Understand the breakdown of your turnover and profit by product, service, department (or however you'd like!) to make sure you're focusing on the areas that provide you the biggest financial gains. We can also comment on your performance v industry and any immediate opportunities for growth.

Remuneration planning

With tax rates and incentives changing all the time, it might be time to consider sitting down with one of our remuneration specialists to discuss how you extract remuneration from your business effectively. This can include salary, bonus, dividends, pension, benefits, share options and more.

Future planning

At some point in the future, your business will need to operate without you and be able to facilitate the exit you need (both financially and operationally). This can take years to implement effectively from internal requirements to external acquisitions. Preparing the business well in advance will leave you best placed to achieve your targets.

Management accounts and bookkeeping

Management accounts are the backbone of strategic decision-making. Our team delivers precise, timely management accounts, whether quarterly or monthly, that provide the real-time insights needed to steer your business toward its goals. From bookkeeping to VAT returns, we take care of the details, so you can focus on growing your business.

Using the latest online accountancy software, our experienced team will make sure your bookkeeping gives you real-time insights to make good business decisions.

We can also support you with raising and sending invoices, reconciliations, payment processing and the preparation and submission of VAT returns.

Where applicable, we can also offer support in training your own in-house accounts lead and offer tips and guidance to your day-to-day bookkeeping and financial reporting.

Digital solutions

The digital landscape offers a wealth of powerful tools to optimise your business operations. Our experts help you navigate these solutions, from leading cloud platforms like Xero and QuickBooks to specialised tools tailored to your needs (such as stock trackers and financial analysis tools). We guide you through onboarding, providing seamless integration and ongoing support to maximise your digital efficiency.

Our digital experts can discuss which option is best for your specific business needs, support you in onboarding new software, guide you on best practice and are on hand to solve any teething problems.

Payroll

We understand payroll can be a highly emotive area for you and your employees, which is why it's vital for your payroll to be accurate, timely and compliant.

We can offer a highly knowledgeable and committed individual who will collaborate closely with you to address all your payroll requirements, ensuring efficiency and accuracy.

From start to finish, we manage the entire process, freeing you to focus on what matters most – running your business.

Consider our fully outsourced solution for even greater peace of mind.

And much more...

Your business is unique, and so are your needs. If there's anything further we can do to support your success, we're here to help.

Get in touch with your usual contact, or use the contact details below, to discuss how we can tailor our services even further to meet your goals and make sure your business is always moving in the right direction.
